Design of Intelligent Fire Management system that generates alerts regarding the fire accidents.

Question	Description
Who does the problem affect?	Industry workers who suddenly meet with the fire accidents.
What is the issue?	Due to sudden occurrence of fire accidents at the Industries, without any Fire management system, we may face loss of life and property.
When does the issue occur?	When sudden fire accidents break out in the industries.
Where is the issue occurring?	In Industries or Factories
Why is it important that we fix the problem?	- To save the life of Industry workers - To protect the machines and other Industry properties from damages

I am

Industry worker

→

I'm trying to

If a sudden fire accident occurs, trying to warn co-workers manually

→

But

It takes a long time and leads to loss in life and property

→

Because

Without use of automation

→

Which makes me feel

Require for the design of the new system
